

1.1.3. Calculate Area of the Square

08:23

Write a Python program that prompts the user to enter the *side_length* of a square and computes the area of the square.

Formula:

- $\text{Area} = \text{side_length}^2$

Input Format:

- The input is a positive integer value that represents the *side_length* of the square.

Output Format:

- The output is a positive integer value that represents the area of the square.

Algorithm To Calculate Area of a Square

Algorithm to Calculate the Area of a Square

Step 1: Start

Step 2: Declare variables side and area

Step 3: Read the value of side

Step 4: Calculate the area using the formula

$$\text{area} = \text{side} \times \text{side}$$

Step 5: Display the calculated area

Step 6: Stop
